

BIOHEAT PRICE PROTECTION PROGRAMS

FLOAT PRICE PROGRAM:

- Price goes up and down based on current market conditions
- Performs well in stable or declining market conditions
- No enrollment fee required
- No specific number of gallons required

This program performs particularly well in stable or even declining market conditions, but leaves customers susceptible to price increases if the market goes up.

PRE-BUY PRICE PROGRAM: **

- Price is locked at a set price and does not move up or down with market conditions
- One-time payment upon submission of contract at discounted rate
- Performs well in a stable or increasing market conditions
- Specific gallons required
- No enrollment fee required

This program is the lowest price protection program offered. The price that you contract for will be the price you pay per gallon for a specific amount of gallons during the program selection process. Under CT State Law, the Pre-Buy Price program is not available from November 1 - March 31.

Enrolling in a price protection program is easy. Call us today at **203.227.5181** or email info@gaultenergy.com so we can guide you through the process.

****Please Note:** When you commit to this program, Gault simultaneously purchases that oil for you from our suppliers - we are not able to break this agreement. This means that if market conditions decrease, you do not get a lower price.

CAP PRICE PROGRAM:

- Price is locked at a ceiling, but allows movement downward if market price declines
- Performs well when market conditions move either up or down dramatically
- Specific gallons required
- Price protection fee is required

This program helps customers protect themselves with assurance against rising prices by creating a ceiling price that will not be exceeded, but it also allows the price to decrease when prices decline. In order to secure the Cap Price for our customers, we are committed to purchase oil futures contracts with our suppliers, thus an enrollment fee is in place.

FIXED PRICE PROGRAM: **

- Price is locked at a set price and does not move up or down with market conditions
- Performs well with stable or increasing market conditions
- Specific gallons required
- No enrollment fee required

This program provides protection against dramatic price increases. The price that you contract for will be the price you pay per gallon for a specific amount of gallons during the program selection process.
