

GENERATOR PROTECTION PLANS

The comfort of being well-protected.

Regular care and maintenance is important on any major home appliance, especially your standby generator. Our generator protection plans will help you save money on costly repairs from unmaintained equipment, reduce the likelihood of breakdown and extend the lifetime of your generator.

PREFERRED PROTECTION PLAN

We'll visit **once a year** to provide our comprehensive service on your air or liquid-cooled generator.

- 1 Inspection of fuel lines and connections
- 2 Inspection of flexible fuel lines
- 3 Inspection of oil level
- 4 Oil replacement
- 5 Oil filter replacement
- 6 Inspection and cleaning of enclosure louvers
- 7 Inspection for vibration, noise, leakage, temperature
- 8 Inspection and cleaning of battery
- 9 Corrosion removal
- 10 Inspection and replacement of electrolyte level (if necessary)
- 11 Inspection and replacement of air cleaner (if necessary)
- 12 Inspection and replacement of spark plug(s) (if necessary)
- 13 Application of corrosion inhibiting spray to engine
- 14 Inspection of electrical connection box
- 15 Inspection of entire electrical system
- 16 Operation test

Our service on liquid-cooled generators also includes:

- 17 Inspection of cooling system, hoses, and belts
- 18 Inspection of coolant level
- 19 Inspection and replacement of distributor cap and rotor (if necessary)
- 20 Inspection and replacement of plugs, plug coils, and plug wires (if necessary)

SUPREME PROTECTION PLAN

We'll visit you **twice a year** to provide a comprehensive service and a 6-month check up on your air or liquid-cooled generator.

The 6-month check up includes the service of:

Lubrication

Fuel system

Engine components

Operating conditions

Cooling system

(on liquid-cooled generators only)
